

Arron J. Linton

Senior Software Engineer | Solutions Engineer
Bernards, NJ • 908-251-2389 • lintonarron@gmail.com

PROFESSIONAL SUMMARY

Senior Software Engineer and customer-facing technologist with 8+ years of experience building production systems and working directly with clients. Proven ability to own customer relationships end-to-end — from onboarding and instruction to retention and account management — with the engineering depth to automate, systematize, and scale what works. Background spans B2B sales at Verizon, technical recruiting at TEKsystems, and three years instructing 300+ engineers at the university level. AI-native by practice: daily use of Claude Code, GitHub Copilot, and Cursor to move faster, work smarter, and build leverage. Thrives in early-stage, high-ownership environments where the work and the systems behind it are built simultaneously.

CORE COMPETENCIES

Customer Success Engineering • Account Management & Renewals • Customer Onboarding • Workflow Automation • AI-Assisted Tooling (Claude Code, GitHub Copilot, Cursor) • Technical Instruction & Webinars • Help Content & Documentation • Cross-Functional Collaboration • React / React Native • TypeScript • Node.js • Express.js • MongoDB • PostgreSQL • Salesforce • API & Webhook Integration • CI/CD Pipelines • Observability & Monitoring (Datadog, Sentry) • Enterprise SaaS • AWS • Google Cloud

PROFESSIONAL EXPERIENCE

Solutions Engineer | The Creative Bomb | Miami, FL (Remote)

September 2024 – Present

- Partner closely with Sales across the full deal cycle — supporting discovery calls, shaping solution positioning, and driving deal strategy to move opportunities forward with technical credibility.
- Create and deliver live product demonstrations, proof-of-concepts, and tailored technical walkthroughs that translate early-stage features into compelling, customer-ready narratives and accelerate deal velocity.
- Resolve bugs and provide ongoing support and iteration for live custom solutions active in the service environment — owning issues end-to-end from triage through resolution.
- Build and maintain AI-assisted workflows using Claude Code, GitHub Copilot, and Cursor — automating repetitive processes, improving consistency, and creating leverage across engineering and customer-facing work.
- Own end-to-end delivery of customer-facing web and mobile applications using React, React Native, TypeScript, Node.js, Express.js, MongoDB, and PostgreSQL — directly accountable for technical outcomes that impact user retention and revenue.
- Architect and integrate payment infrastructure via Stripe and RevenueCat, including subscription lifecycle management and event-driven backend processing — translating complex customer requirements into seamless product experiences.
- Champion production observability using Sentry — implementing alerting, error triage, and performance profiling
- Design and maintain automated CI/CD pipelines using GitHub Actions and Expo EAS, reducing manual overhead and enabling zero-downtime releases.

Founder & Consultant | Magistri Dev | Bernards, NJ

January 2024 – Present

- Owned the full sales and implementation lifecycle — from prospecting and discovery through software delivery and ongoing client technical support — operating as both the business development lead and primary engineer.
- Sourced, closed, and delivered a custom CRM for The Takedown (a DMCA enforcement company), translating complex client requirements into a production system and serving as the sole point of contact from deal to deployment.
- Guide clients in navigating the AI ecosystem — evaluating LLM APIs, agentic frameworks, and integration patterns to help them identify the right tools and build with confidence.
- Managed up to 5 concurrent client projects, balancing delivery timelines, client relationships, and technical execution simultaneously.
- Built client solutions using TypeScript, React, Node.js, PostgreSQL, AWS, and Google Cloud — owning architecture, development, and deployment end-to-end.

Software Engineer | 2U Inc. | New York, NY

July 2020 – May 2024

- Collaborated cross-functionally with product managers, designers, and business stakeholders to translate business requirements into scalable technical architectures.
- Led company-wide Datadog observability rollout — drove adoption across multiple engineering teams, authored documentation, and reduced mean time to resolution (MTTR) by 30%; a direct example of influencing technical strategy beyond individual contribution.
- Delivered high-impact enterprise SaaS features end-to-end using React, TypeScript, Golang, Node.js, and PostgreSQL, partnering directly with product and engineering stakeholders to scope requirements and ship solutions on time.
- Built Salesforce Lightning Web Components (LWC) with Apex to support internal staff workflows — extending platform capabilities and keeping Salesforce in sync as the organizational source of truth across integrated systems.
- Authored ATAMs (Architecture Tradeoff Analysis Method) to evaluate infrastructure, technology, and tooling decisions.
- Designed and built Golang microservices supporting high-traffic, customer-facing platforms — ensuring reliability, scalability, and performance under enterprise-grade load.

Lead Instructor | University of Washington | Seattle, WA

July 2018 – July 2020

- Owned the end-to-end success of 300+ engineers navigating complex technical coursework for the first time — guiding onboarding, driving adoption, and ensuring every student reached their intended outcome.
- Built working prototypes and delivered live technical presentations translating complex abstract concepts into clear, hands-on demonstrations that drove engagement and accelerated understanding.
- Developed and maintained help content, technical documentation, and instructional materials that scaled individual support into a repeatable, self-serve resource for the entire cohort.

EARLIER EXPERIENCE

Account Executive — Verizon | Technical Recruiter — TEKsystems

B2B enterprise sales, quota attainment, client relationship management, and technical talent acquisition — establishing a foundation in direct customer ownership, outreach at volume, and relationship-driven retention that informs every customer-facing role since.

ADDITIONAL EXPERIENCE

Emcee | Weddings, Bar/Bat Mitzvahs, Corporate Events | *2013 – Present*

Hosted 100+ live events over 13 years; known for setting the tone, energizing the room, and keeping audiences engaged from the first moment to the last — seamlessly guiding event flow, transitioning between segments, and creating memorable experiences that leave lasting impressions.

EDUCATION

Full Stack Web Development — Rutgers, The State University of New Jersey | 2016–2017

Bachelor of Arts, Economics & Entrepreneurship — Rutgers, The State University of New Jersey | 2009–2013
